SUMMARY

I am an enthusiastic and motivated aspiring Junior Developer, currently building a strong foundation in C++, PHP and SQL. I am learning object-oriented design principles and gaining experience in writing clean, maintainable code. Additionally, i am developing teamwork and communication skills while adapting to new technologies. I am committed to continuous learning and growth, with the aim of contributing effectively to future software projects.

PROJECT EXPERIENCE

Personal Portfolio Website

- Designed and developed a personal portfolio website to showcase my projects, skills, and background.
- Implemented a clean UI/UX layout, responsive front-end design, and seamless contact form integration using Formspree.
- Handled all development tasks including coding, optimization, and deployment on Netlify.
- Hosted the website live at: matemubaloyiportfolio.netlify.app

Elsiestore Website

- Built a fully functional e-commerce website for a real street vendor using HTML, CSS, PHP, JavaScript, and MariaDB.
- Implemented product management, admin dashboard, category-based filtering, and multi-image upload using Cloudinary.
- Developed responsive front-end and handled client-side logic for product display and cart functionality.
- Hosted the website live at: elsiestore.co.za

WORK EXPERIENCE

Education Assistant e-Cadre ICT Support — June 2025 - November 2025

Rivoni School for the Blind

- Provided technical support to learners and staff, ensuring smooth operation of computers, mobile devices, and assistive technologies used by visually-impaired students.
- Assisted with troubleshooting hardware and software issues, including device setup, system updates, and basic maintenance.
- Supported teachers with ICT-related tasks to enhance digital learning and accessibility in the classroom.
- Helped learners navigate digital tools and devices safely, promoting independence and an inclusive learning environment.
